SYLLABUS: STAT 2480
STATISTICS FOR THE LIFE SCIENCES
SPRING 2021

Course overview:
An introduction to statistical methods commonly used in the life sciences

Instructor
Name: Nikki Schnitzler
Email: schnitzler.6@osu.edu
Office hours: TBD
Office Location: All office hours, and any other needed meetings, will be conducted on Zoom. Links can be found on the course homepage.

Teaching Assistants
Name: Ningyi Liu
Email: liu.5405@osu.edu
Tutoring hours: TBD

Name: Jiahao Ping
Email: ping.24@osu.edu
Tutoring hours: TBD

Graders
Name: Yongqi Liu
Email: liu.8224@osu.edu
Tutoring hours: TBD
Course Coordinator
Name: Dr. Kubatko
Email address: kubatko.2@osu.edu

Course description

Statistical methods play an important role in the analysis of data collected in the biological sciences. This course will provide an introduction to the analysis of biological data in a statistical framework. The topics covered include the definition of probability and manipulation of probabilistic quantities; the common discrete and continuous distributions used in modeling biological phenomena; experimental design; and statistical methods for testing hypotheses.

Course learning outcomes

By the end of this course, students should successfully be able to:

- Understand and discuss methods of collecting data
  - By providing examples of methods of random sampling
  - By explaining correct procedures for designing experiments and observational studies
  - By explaining uses and misuses of sample surveys

- Use statistical tools for presentation of data and to understand presentations of data
  - By discussing when different types of graphical displays are appropriate and explaining proper methods of constructing graphical displays
  - By using appropriate summary statistics to describe the distribution of data
  - By introducing statistical terminology used to describe data and distributions

- Analyze data
  - By constructing and interpreting confidence intervals
  - By conducting and interpreting hypothesis tests
  - By using simple linear regression for bivariate data

- Understand basic probability and statistical concepts
  - By presenting and applying rules of probability
– By study of the common discrete and continuous distribution used to model biological data
– By discussing sampling distributions and the use of the Central Limit Theorem as the foundation of inference

• Evaluate statistical procedures and summaries
  – By discussing assumptions and conditions for analysis procedures
  – By identifying sources of bias in sampling, experiment, and survey methods
  – By discussing appropriate nature and scope of conclusions for analysis procedures
  – By discussing case studies in the life sciences

GE Course Information
• This course satisfies the GEC Data Analysis requirement
• The expected learning outcomes are:
  o ELO1: Students understand basic concepts of statistics and probability.
  o ELO2: Students comprehend methods needed to analyze and critically evaluate statistical arguments.
  o ELO3: Students recognize the importance of statistical ideas.
• These goals will be achieved by detailed study utilizing example data from the life sciences.

Course materials

Required
• The textbook and the accompanying homework management system, Sapling, are for this course is being provided via CarmenBooks. Through CarmenBooks, students obtain publisher materials electronically through CarmenCanvas, saving them up to 80% per title. The fee for this material is included as part of tuition and is listed as CarmenBooks fee on your Statement of Account. In addition to cost-savings, materials provided through CarmenBooks are available immediately on or before the first day of class. There is no need to wait for financial aid or scholarship money to purchase your textbook. Unless you choose to opt-out of the program, you do NOT need to purchase any materials for this course at the bookstore. For more information on the program or information on how to opt out, please visit the CarmenBooks website, https://affordablelearning.osu.edu/carmenbooks/students
• Need help with the textbook? The publisher’s technical support team can be reached by phone, chat, or by email via the Student Support Community. To contact support please
open a service request by filling out the webform at
https://macmillan.force.com/macmillanlearning/s/contactsupport
(Privacy notice: https://store.macmillanlearning.com/us/privacy-notice)

Course technology
For help with your password, university e-mail, Carmen, or any other technology issues, questions, or requests, contact the OSU IT Service Desk. Standard support hours are available at https://ocio.osu.edu/help/hours, and support for urgent issues is available 24x7.

• Self-Service and Chat support: http://ocio.osu.edu/selfservice
• Phone: 614-688-HELP (4357)
• Email: 8help@osu.edu
• TDD: 614-688-8743

Baseline technical skills necessary for online courses
• Basic computer and web-browsing skills
• Navigating Carmen; the following website may help you if you encounter difficulties with Carmen: https://resourcecenter.odee.osu.edu/canvas/.

Necessary equipment
• Computer: current Mac (OS X) or PC (Windows 8+) with high-speed internet connection OR tablet with web-browser capabilities and high-speed internet connection
• CarmenZoom text, audio, and video chat. If you need technical assistance, either call 614-688-HELP, or refer to the online instructions:
https://resourcecenter.odee.osu.edu/carmenzoom

Necessary software
• No additional software is required beyond a web-browser; students will be given instructions for using the open-source R statistical software at the Ohio Supercomputer Center through their web browser. This software will be accessible on either a laptop or a tablet.

Online Course Delivery
The vast majority of the course will be completed asynchronously, meaning that you will be able to study materials and work on assessments according to your own schedule. Each week several lecture videos, totaling approximately 1.5 hours of lecture, will be posted on the course website. You are responsible for watching the videos and studying the material that is assigned each week. In addition to the lecture videos, weekly assignments, including a laboratory activity using the R statistical software, will be posted on the class website. You will be given ample time to complete the assignments.
The instructor will hold weekly office hours via Zoom. The dates and times will be announced later and posted on the Carmen website. The instructor and teaching assistants will initiate and manage active discussion boards, also via Carmen. Additionally, information about how and when students can access free tutoring from the Mathematics and Statistics Learning Center (MSLC) will be provided.

Assignment Information

**Homework:** Required homework problems will be assigned for each topic covered in the course, and solutions will be submitted and graded via Sapling or Carmen. Periodically, recommended problems will also be posted for additional practice, but will not be collected or graded. You need to work through homework problems on your own in a timely manner in order to perform well in the class. Homework is worth 25% of your overall grade.

**Labs:** Lab exercises using the R software will be carried out once per week in place of a formal lecture. These lab exercises will be submitted via Carmen quizzes and will together account for 20% of the overall grade.

**Discussion Assignments:** At two points during the semester, you will be required to create a discussion board post that shows an improper use of statistics. This could be a graph, statistical
hypothesis test, discussion of data, etc., that you find in a news article, blog post, or twitter thread, for example. Each post should be accompanied by a couple of sentences describing what is incorrect. You will also be required to comment on at least two of the other students’ posts, to either agree, point out an additional problem, or argue that the posted information is actually correct. A rubric and due dates will be provided on Carmen. Each post and set of comments are worth 2.5% of your grade.

Exams: There will be two midterms exams and a final exam. Statistical tables will be provided as needed. Please note the dates of all exams as given on the syllabus (below). All exams will be administered remotely on Carmen.

Formulas for use on the exams: Formula sheets will be provided for all exams. The formulas sheets will be made available prior to the exams to assist in exam preparation.

Makeup exams: If you absolutely need a makeup exam and have a valid excuse, please see your instructor for the necessary arrangements. However, you must notify the instructor in advance in such a situation. A make-up exam should be taken within a week of the missed exam. Exceptions to this policy will be permitted on a case-by-case basis and only in extreme situations.

Late assignments

Late assignments are not accepted without prior permission from the instructor.

Grading scale

73–76.9999: C
70 –72.9999: C-
67 –69.9999: D+
60 –66.9999: D
Below 60: E
Communication

Discussion boards and office/tutoring hours will be the primary mode of student to instructor communication in this class. There will be discussion boards for each assignment and for other general course questions. If you email a question that is appropriate for the discussion board, we will copy it verbatim to the board and include our reply there. Of course, there will be times that questions will arise will need to be addressed over email. In that case, please begin your email’s subject with STAT 2480. Remember that all course email correspondence must be conducted using your valid OSU name.# email account.

At the beginning of each week’s module, there will be a page with announcements. Other announcements and reminders will be made via Carmen announcements and/or Carmen messages.

Staff feedback and response time

We are providing the following list to give you an idea of our intended availability throughout the course. (Remember that you can call 614-688-HELP at any time if you have a technical problem.)

Canvas Conversations

A course instructor or teaching assistant will reply to messages sent via Canvas Conversations within 24 hours on school days (Monday – Friday, excluding university holidays; list of holidays at http://registrar.osu.edu/staff/bigcal.asp).

Discussion board

We will check and reply to messages in the discussion boards as appropriate every 24 hours on school days.

Live Zoom office hours

Each week, there will be live Zoom office hours. The dates and times of these will be communicated clearly and well in advance. An announcement will also be posted on the class website.

If you have questions about the Mastery Assessments (Homework, Exams, etc.) or notice any typos in the material, please message us directly via Canvas Conversations – please do not use the Discussion board.

Communication guidelines

The following are our expectations for how we should communicate. Above all, please remember to be respectful and thoughtful.
• **Writing style:** While there is no need to communicate as if you were writing a research paper, you should remember to write using good grammar, spelling, and punctuation. Informality (including an occasional emoticon) is fine for non-academic topics.

• **Tone and civility:** Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online.

• **Backing up your work:** Consider composing your academic posts in a word processor, where you can save your work, and then copying into the Carmen discussion.

### Other course policies

**Student academic services**

Student academic services offered on the OSU main campus [http://advising.osu.edu/welcome.shtml](http://advising.osu.edu/welcome.shtml).

**Student support services**

Student support services offered on the OSU main campus [http://ssc.osu.edu](http://ssc.osu.edu).

**Academic integrity policy**

**Policies for this online course**

• **Homework:** Homework may be discussed with classmates or TAs but submitted homework assignments should represent your own efforts.

• **Lab activities:** can be completed in a “group setting” by collaborating with other students in the class. Help from sources outside of this class is not allowed.

• **Exams:** You must complete the exams yourself, without any external help or communication.

**Ohio State’s Academic Integrity Policy**

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term “academic misconduct” includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct [http://studentlife.osu.edu/csc/](http://studentlife.osu.edu/csc/).
Copyright disclaimer

The materials used in connection with this course may be subject to copyright protection and are only for the use of students officially enrolled in the course for the educational purposes associated with the course. Copyright law must be considered before copying, retaining, or disseminating materials outside of the course.

Statement on Title IX

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator, Kellie Brennan, at titleix@osu.edu

Accessibility accommodations for students with disabilities

The university strives to make all learning experiences as accessible as possible. In light of the current pandemic, students seeking to request COVID-related accommodations may do so through the university’s request process (https://slds.osu.edu/covid-19-info/covid-related-accommodation-requests/), managed by Student Life Disability Services. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let me know immediately so that we can privately discuss options. To establish reasonable accommodations, I may request that you register with Student Life Disability Services. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. SLDS contact information: slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Accessibility of course technology

This online course requires use of Carmen (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.

- Carmen (Canvas) accessibility
- Streaming audio and video
- Synchronous course tools
Your mental health!

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student’s ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life’s Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available through the 24/7 National Suicide Prevention Hotline at 1-800-273-TALK or at suicidepreventionlifeline.org
